

## Category Guidelines

### *Film Production*

**FILM PRODUCTION** is the process of making a film. The **producer** (student submitting the entry) is not required to appear in the film but if the student chooses to, a camera tripod may be used. All screenwriting, directing and editing must be done by the student producer. All entries must be original student footage. *PowerPoint presentations are prohibited.*

***New this 2022-2023 year: Actual camera work (filming) does not have to be by the student but does have to be directed by the student for the purposes of this entry. Footage filmed by family or friends for some other purpose (such as a past family vacation, a past performance, etc) and not for the sole purpose of this contest is not acceptable.***

Consider the following styles to portray your original work of fiction or nonfiction:

- **Animation:** Demonstrates motion by sequencing still objects or using computer-generated graphics.
- **Narrative:** Tells a fictional story developed by the student.
- **Documentary:** Presents facts and information.
- **Experimental:** Explores movement, light and montage.
- **Multimedia:** Uses a combination of different contents (text, audio, still images, animation, etc.).

An explanation of the storyline and/or the significance of the film style might be a useful addition to the artist statement. Whether an entry displays use of technologies or a simple approach, it will be judged primarily on how well the student uses his or her artistic vision to portray the theme, originality and creativity. *Software can be used to create an entry but only to enhance and/or present the work, not provide the primary design.*

**Copyright:** Entry may include public places, well-known products, trademarks or certain other copyrighted material as long as that copyrighted material is nonessential to the subject matter of the piece and/or is a smaller element of a whole. Use of background music must be cited on the student entry form.

**Suggestions for Audio/Visual Quality:**

- Use a tripod to hold the camera still
- Make sure there is plenty of lighting, especially if shooting indoors
- Turn off all noise-making devices in the room (air conditioners, fans, telephones, etc.)
- Record a short test and listen to it. If needed, change the record volume or microphone location.
- Make sure the background music (if any) is audible on the recording.

- Allow for two seconds of silence at the beginning and end of your recording.
